

OurNigeria — Company Structure

Based on strategy conversation with Timi (advisor call).

Dual-Entity Model

OurNigeria operates as two complementary entities: a for-profit research company that generates revenue, and a non-profit foundation that drives the civic mission. The for-profit arm funds the non-profit arm.

Entity 1: OurNigeria Research (For-Profit)

REGISTRATION

- **Type:** Limited liability company (Ltd/Gte or Ltd)
- **CAC classification:** Research, data collation, and technology
- **Description:** Keep it broad and non-political — “Research, data collation, technology, and general research platform”
- **Priority:** Register FIRST — this is faster than non-profit registration and enables partnerships, invoicing, and contracts immediately

WHAT IT DOES

- Sells data products and API access to enterprise customers
- Provides commissioned/sponsored research reports
- Licenses cleaned, structured government financial data
- Offers opinionated analysis and insights (separate from the neutral citizen-facing product)
- Builds and maintains the core technology platform

REVENUE STREAMS

Stream	Description	Target customers
Data API subscriptions	Authenticated API access to structured government data (FAAC, budgets, spending, corruption)	Research firms, consulting companies, media houses
Commissioned research	Paid research reports on specific topics (e.g., state-level fiscal analysis, policy impact)	NGOs, development partners, consulting firms
Data licensing	Bulk data exports for integration into customer systems	Credit rating agencies, banks, MFBs, insurance companies
Media partnerships	Revenue share from ad-supported data content on partner platforms	Online publications (TechPoint, TechCabal, Pulse, etc.)
Credit intelligence	Government creditworthiness profiles and financial health data	Banks, MFBs, insurance companies, credit bureaus
SaaS tools	Embeddable widgets, CMS plugins, fact-checking API	Media houses, newsrooms

CUSTOMERS (BY SEGMENT)

Tier 1 — Quick wins (start here)

- Online tech/news publications: TechPoint, TechCabal, IntelPoint
- They have tech infrastructure to integrate APIs
- Partnership model: they make money from enhanced content, we earn from data access + revenue share

Tier 2 — High value

- Research firms and consulting companies

- Credit rating agencies: CRC, CreditRegistry, FirstCentral
- Digital credit companies: LendSquare, CreditCheck, CredPal
- MFBs (many lack data infrastructure — easier to sell to than banks)

Tier 3 — Long sales cycle

- Banks (Premium Trust Bank, Sterling, etc.) — lend to governments, need fiscal data
- Insurance companies
- Government agencies themselves
- International development partners (World Bank, IMF, DFID)

Tier 4 — Distribution partners (no direct revenue)

- Traditional media: Channels TV, Arise News, Premium Times, The Cable
 - These won't pay licensing fees but provide massive distribution reach
 - Model: provide plug-and-play tools they use for free, monetize via brand awareness and grants
-

Entity 2: OurNigeria Foundation (Non-Profit)

REGISTRATION

- **Type:** Incorporated Trustees (non-profit under CAC Part F)
- **Note:** Takes significantly longer to register in Nigeria (CAC + EFCC clearance). Start the process concurrently with the for-profit registration, but don't wait for it
- **Priority:** Register in PARALLEL with for-profit — don't let this delay operations

WHAT IT DOES

- Operates the free, citizen-facing platform (chat interface, public data access)
- Produces and distributes free content (social media, newsletters, WhatsApp)
- Runs civic education and awareness campaigns
- Partners with universities for research access programs
- Partners with advocacy groups and political science unions
- Maintains editorial neutrality — no opinionated analysis on the citizen-facing side

FUNDING SOURCES

Source	Description	Status
Google AI for Governance Innovation	AI for public information and governance transparency	Application in progress
MacArthur Foundation	Governance and accountability programs in Nigeria	Currently closed for Nigeria — monitor
Ford Foundation	Civic engagement and government transparency	Open — apply
Gates Foundation	Works through 200+ consulting/research partners globally	Research partnership opportunities
USAID	Democracy and governance programs	Explore
Jerry Foundation	Grant opportunity shared by Timi	Needs investigation
OSIWA	Open Society Initiative for West Africa	Explore
Cross-subsidy from for-profit	Percentage of enterprise revenue funds civic operations	Ongoing once revenue starts

PROGRAMS

- **Civic literacy content:** Daily/weekly data insights distributed via Twitter, WhatsApp, email
- **University research program:** Free/subsidized platform access for students and faculty in political science, economics, public policy, journalism
- **Campus ambassador program:** Student ambassadors at Nigerian universities driving adoption
- **Media partnerships:** Free tools for traditional media to improve data-driven reporting
- **Community outreach:** Partnerships with advocacy groups, political activist organizations, unions

How the Two Entities Interact

SHARED INFRASTRUCTURE

- Same underlying data pipeline (ingestion, cleaning, structuring, embedding)
- Same vector database and search infrastructure
- Same LLM/AI layer for natural language queries
- Shared engineering team maintains both

SEPARATED CONCERNS

- **For-profit** adds opinionated analysis, premium endpoints, SLA guarantees, dedicated support
- **Non-profit** maintains editorial neutrality, free access, no paywall on basic civic data
- Enterprise API is a separate authenticated layer on top of the same data
- Content tone differs: B2B is analytical/professional, B2C is accessible/educational

Team Structure (Target)

PHASE 1 — NOW (SOLO/LEAN)

- **Arinze** — Engineering, product, data pipeline, everything

PHASE 2 — POST FIRST REVENUE/GRANT

- **Engineering:** 1 additional developer (backend/data)
- **Content:** 1 writer/editor for data narratives + social content
- **Design:** 1 designer for infographics and visual content (contract)
- **Partnerships:** Arinze handles directly

PHASE 3 — SCALING

- **Engineering team:** 2-3 developers
 - **Content team:** Writer, designer, social media manager, animator/videographer
 - **Sales/partnerships:** 1 dedicated person for enterprise relationships
 - **Research:** 1 analyst for commissioned reports and opinionated analysis
-

Incorporation Checklist

FOR-PROFIT (DO FIRST)

- ☐ Choose company name (e.g., “OurNigeria Research Ltd” or “OurNigeria Data Ltd”)
- ☐ Register with CAC as limited liability company
- ☐ Business description: “Research, data collation, technology, and general research platform”
- ☐ Open corporate bank account
- ☐ Set up invoicing capability
- ☐ Register for tax (FIRS)

NON-PROFIT (START IN PARALLEL)

- ☐ Choose foundation name (e.g., “OurNigeria Foundation”)
 - ☐ Register as Incorporated Trustees with CAC (Part F)
 - ☐ Draft constitution/trust deed
 - ☐ EFCC clearance (required for non-profits)
 - ☐ Apply for tax exemption
 - ☐ Set up separate bank account for grant funds
-

Key Principles

1. **For-profit first** — incorporation is faster, enables immediate business operations
2. **Revenue funds mission** — enterprise revenue keeps the lights on and funds the civic platform
3. **Separate but connected** — same tech, different interfaces and value propositions
4. **Non-political registration** — keep corporate filings broad and neutral
5. **Make money from day one** — don't wait for grants to start generating revenue
6. **B2B is the cash cow, B2C is the brand** — both are essential, but B2B pays the bills
